Following the publication of the original paper [1], the authors reported a typographical error in the sequence of SAMlibrary-HiSeq_50bp-F1 used for NGS library preparation (as listed in Table S1).

The sequence for Primer 1: SAMlibrary-HiSeq_50bp-F1 has two extra bases inserted (in bold) **ACACTCTTTCCCTACACGACGCTCTTCCGATCTATCTTGTGGAAAGGACGAAACA**

The correct sequence should be:

ACACTCTTTCCCTACACGACGCTCTTCCGATCTCTTGTGGAAAGGACGAAACA
